

Darin Billerbeck Joins Everspin Technologies Board of Directors

Semiconductor industry executive adds valuable memory industry experience to Everspin's board of directors

Chandler, AZ, August 24, 2018 — Everspin Technologies, Inc. (NASDAQ: MRAM), the market leader in MRAM, today announced that Darin Billerbeck, former CEO of Lattice Semiconductor, has been elected to Everspin's Board of Directors.

Billerbeck was CEO of Lattice Semiconductor for more than seven years, until his retirement in 2018. During his tenure with Lattice, he steadily increased shareholder value, while expanding the technology, products and the intellectual property of the company. In addition, he gained intimate knowledge of U.S. and China intellectual property laws specifically with respect to the Committee of Foreign Investment in the US (CFIUS).

Prior to joining Lattice, Billerbeck served as the President and CEO of Zilog, which was acquired by IXYS Corporation in 2010. Before joining Zilog, Billerbeck served for more than 18 years at Intel in various executive and management positions. While with Intel, he served as Vice President and General Manager of the Flash Products Group, where he managed a \$2+ billion business and directed the efforts of thousands of employees worldwide. Billerbeck has also led several key engineering functions in the memory space, including Director of Design Engineering, Director of Packaging and Director of Operations.

“Darin brings highly relevant experience to Everspin's Board of Directors spanning microcontrollers, programmable logic and memory technologies along with that of a public semiconductor company CEO. Billerbeck's rich experience in memory, component and intellectual property will be a key resource as we grow the mainstream adoption of our STT-MRAM products

into new markets and applications,” said Kevin Conley, President and CEO of Everspin.

The addition of Billerbeck to Everspin’s Board of Directors increases the number of directors to eight.

About Everspin Technologies

Headquartered in Chandler, Arizona, Everspin Technologies, Inc. is the worldwide market leader in Magnetoresistive RAM (MRAM) for applications where data persistence, performance, and endurance are paramount. With over 70 million MRAM products deployed in data center, cloud storage, energy, industrial, automotive, and transportation markets, Everspin has built the strongest and fastest-growing foundation of MRAM users in the world.
